

# Double Distilled Water Plant

Approx. **Rs. 32,000** / Piece

Product Details:

Usage/Application	Chemical and Physical Laboratory
Type	TABLE TOP MODEL
Mounting	TABLE TOP
Material	Borosilicate Glass
Brand	SSGW
Place Of Origin	India

The components of double distilled water plant are glass boiler, condenser, water collector and cold water supply (condensation). When water is boiled into vapor and condensed to liquid in another container, impurities in the water that do not boil near the boiling point of water remain in the original container. Thus, distilled water is purified water.

## ❖ Features:

- High performance
- Low maintenance
- High durability

## ❖ Specifications:

- Comprises of a borosilicate glass boiler
- High efficiency coil condenser to ensure a cool distillate
- Stands and clamps
