

Magnetic Stirrer

Approx. **Rs. 9,580** / Piece

Product Details:

Brand Name : Remi

Type of Product : Stirrers with Hotplate

Max.stirring quantity (Water) 1 Ltr

Stirring Paddle Model: Q-19, Length: (PTFE coated) : 9 x 25 mm

Application School, Hospital, Lab

Voltage 220 - 240 Volt

Magnetic stirrers have advantage over motorized ones. They are quieter and more efficient. They have no moving external parts to break or wear out. For cleaning stir bars you don't need lubricants which could be the reason of contamination of the product. It generates magnetic field to rotate a magnet which can be used inside a container in which stirring motion is required. It reduces manual stirring and assures homogeneity in stirring. Some stirrers have heater to the plate below the container. The temperature and rotation controls are given on the front display. It is used in various research laboratories to mix chemical solutions, sample preparation, biological and pharmaceutical research also in industries in quality control.

❖ Features:

- PMDC motor for higher torque even at low speeds
- Better speed regulation even with small volume and low speeds

- Accurate stepless speed control maintains excellent speed stability.
- Digital Speed Indicator for displaying of stirring speed
- Totally enclosed unit
- Designed for use even in corrosive atmosphere

❖ **Specifications:**

- Dimensions (W x H x D) mm - 200 x 225 x 185 mm
- Power - 500W
- Speed Display - LED
- Platform Size – 200 X 225mm
- Rated Voltage - 220V
