# **Workshop on Water and Waste Water Management: Importance and New Technologies**

**Date: 18/05/2022**

## ***A Report on One Day Online Lead College Workshop on***

### ***“Water & Waste Water Management - Importance & New Technologies”***

**Organized by Dept. of Chemistry,**

**Conducted on Tuesday, 18<sup>th</sup> January 2022**

A one day online workshop on “Water & Waste Water Management - Importance & New Technologies” was organised by Department of Chemistry on Tuesday, 18th January 2022 under Shri Vijaysinh Yadav College, Peth Vadgaon cluster, Lead college Scheme of Shivaji University, Kolhapur. The workshop inaugural function was started by introduction and welcome speech by Dr. A. A. Ghare, Head, Dept. of Chemistry. Principal Dr. V. S. Dekhale Sir chaired the function as President. In presidential remark he stated that educating our youth and future builders about environment protection and environment management is must for sustainable future. As Ichalkaranji is known for its textile manufacturing industry and Manchester city of Maharashtra, water and waste water management is topic of prime importance for population of Ichalkaranji. Dr. P.K. Waghmare discussed the objectives of Lead College Cluster Scheme of Shivaji University, Kolhapur. The Inauguration function ended by Vote of Thanks by Miss P. V. Mane.

First session was started by introduction of Resource person by Dr. D. A. Kumbhar. Resource person Hon’ Er. D. S. Mali, HOD Dept. of Environment Management, Chhatrapati Shahu Insitute of Business Education and Research, Kolhapur, is expert in Environmental Engineering and Pollution Management and has twenty eight years of teaching and research experience. He emphasizes that industrialization is must for progress of country buy urbanization and population explosion are the two main reasons for water pollution. He explained about maintenance of septic tank and use of sophisticated designed working treatment plant. He emphasizes on use of Clean Development Mechanism (CDM) to solve the pollution problem before it arises. To minimize the pollution the waste of one industry should act as raw material for other industry and accordingly research should be carried out in developing new technologies for industrial manufacture. The first session ended with Vote of Thanks by Miss P. A. Mongunde.

# **Workshop on Water and Waste Water Management: Importance and New Technologies**

**Date: 18/05/2022**

For second session the Resource person was Mr. B. D. Powar, Environmental Officer, Ajinkyatara Co-operative Sugar Factory, Satara. He is expertise in erection and commissioning of waste water treatment plants and associated consultant in Mitcon Envirotech Ltd, Pune. For Environmental impact assessment studies for Central Pollution Control Board, Maharashtra Pollution Control Board.

Second session was started by introduction of Resource person by Mr. S. R. More. Mr. B. D. Powar in his expert talk, explained about importance of water budget of industry. Water monitoring is important for water budget. It is Corporate Responsibility for Environmental Management (CREP). Every year Environmental audit is done for industry and it should be as per laws set by Maharashtra Pollution Control Board. Previously in sugar industry there was use of 400 litres of water for production of sugar from 1 ton sugarcane. About fifty new technologies came into force due to CREM norms that reduces the use of water from 400 litres to 100s litres for production of sugar from 1 ton sugarcane. There are four pillars for water treatment:

- 1) Plant Renovations by changes in procedure.
- 2) Reduce effluent generation.
- 3) Recycling of water.
- 4) Treatment on water before disposal.

For water management and waste water treatment, new technologies are developed by improving old technologies. New technologies include MBBR (Moving Bed Biofilm Reactor), CSTR (Completely Stirred Tank Reactor) and AOPs (Advanced Oxidation Processes). Lastly he said that due to burdens from government about environment protection, industries are switching to new technologies and this is must for sustainable future. Nice anchoring for this event was done by Miss. S. B. Fadtare. The successful workshop ended around 3.00 pm with the concluding remarks and vote of thanks by Miss S. S. Pujari.

The workshop was very informative and provided the participants with valuable knowledge on various aspects of water and waste water management. Also it was helpful for creating awareness about Environmental protection and also to know about career and job opportunities in area of environmental management. For this workshop around 181 students with their faculty members of various colleges were present and they love the event as a

Convener  
HEAD,

Department of Chemistry,  
Jattajirao Kadam Arts, Science  
& Commerce College,  
ICHALKARANJI.

## **1. General Information**

**Wastewater management or treatment** is a process used to remove contaminants from wastewater and convert it into an effluent that can be returned to the water cycle. Once returned to the water cycle, the effluent creates an acceptable impact on the environment or is reused for various purposes (called water reclamation).<sup>[1]</sup> The treatment process takes place in a wastewater treatment plant. There are several kinds of wastewater which are treated at the appropriate type of wastewater treatment plant. For domestic wastewater (also called municipal wastewater or sewage), the treatment plant is called a sewage treatment plant. For industrial wastewater, treatment either takes place in a separate industrial wastewater treatment plant, or in a sewage treatment plant (usually after some form of pre-treatment). Further types of wastewater treatment plants include agricultural wastewater treatment plants and leachate treatment plants.

Processes commonly used include phase separation (such as sedimentation), biological and chemical processes (such as oxidation) or polishing. The main by-product from wastewater treatment plants is a type of sludge which is usually treated in the same or another wastewater treatment plant. Biogas can be another by-product if anaerobic treatment processes are used. Some wastewater may be highly treated and reused as reclaimed water. The main purpose of wastewater treatment is for the treated wastewater to be able to be disposed or reused safely. However, before it is treated, the options for disposal or reuse must be considered so the correct treatment process is used on the wastewater.

The term "wastewater treatment" is in the literature often used to mean "sewage treatment". Strictly speaking, wastewater treatment is broader than sewage treatment.

### **Aims and objectives of the Webinar:**

To bring awareness about water and its management among the peoples.

# **Workshop on Water and Waste Water Management: Importance and New Technologies**

**Date: 18/05/2022**

## **Description About the Program:**

### **Introduction of the webinar and welcome speech:**

Dr. A. A. Ghare (Convener) given an introduction to the webinar topic. It includes the overall scope and importance of the topic. Also, he welcomes all the patrons, committee members, participants in her speech.

### **Presidential address:**

The I/C Principal Prof. (Dr.) Vitthal Shankar Dhekale (Principal, Dattajirao Kadam Arts, Science and Commerce College, Ichalkaranji) delivered a presidential address in the webinar. He focused on important aspects of Water and waste water management needs of self-awareness among the people.

### **Introduction of Speaker:**

Mr. D. A. Kumbhar (Organizing Secretary) given a brief Profile of Dr. G. S. Grover including his educational and career background.

### **Talk of invited Speakers:**

Er. D. S. Mali ((HOD, Department of Environment Management Chhatrapati Shahu Institute of Business Education And Research, Kolhapur) spoke on the value of water and its management also given good examples. Overall the entire session was an interactive session. Also Mr. B. D. Powar shown reality of today's condition and given stress on self-discipline.

### **Discussion session:**

The speakers answered many queries raised by the participants. Participants asked diverse problems regarding water waste management. The speaker gave helpful solution to their problems and satisfied them.

### **Vote of Thanks**

The vote of thanks given by Ms. S. J. Kamble for Inaugural Session while Ms. P. A. Mongunde, for Session I and Ms. S. S. Pujari for session II and conclude this webinar.

### **Anchoring:**

All responsibilities of anchoring effectively done by Ms. S. B. Fadare

Subject – Regarding invitation as Resource Person...

Respected Sir,

With reference to above cited subject, Department of Chemistry is going to organize one day workshop on "Water and Waste Water Management: Importance and New Technologies" on Tuesday, 18/01/2022 at 11.00 am in online mode under Lead College Cluster. I am pleased to invite you as Resource Person for the said workshop. We believe that, your presence and guidance as a Resource Person for this workshop would be a great opportunity for us. Your thoughts, expertise and experience enable to gain knowledge to one and all. So, it's our humble request to you to accept our invitation as Resource Person for the same.

We look forward to your presence and guidance.

Yours faithfully,  
  
(Dr. V. S. Dhekale)  
I/c Principal  
D.K.A.S.C. College,  
Ichalkaranji.

Subject - Gratitude letter...

Respected Sir,

We are very much thankful to you for your speech as Resource Person for one day Lead College workshop on "Water and Waste Water Management: Importance and New Technologies" organized by Department of Chemistry on Tuesday, 18/01/2022 at 11.00 am in online mode. Our students are highly enlightened and inspired by your knowledge and guidance.

We expect your kindly co-operation in future also.

Yours faithfully,  
  
(Dr. V. S. Dhokale)  
I/c Principal  
D.K.A.S.C. College,  
Ichalkaranji.
